Dear [REDACTED]

25X1A

Your sign-off copies for Shipments AFH 1, 2, 3, 5, 6, 7, and 9 through 19; and [REDACTED] sign-off copies for Spare Parts Shipments 1, 2, 3, and 4 were forwarded to Dan as evidence of the completion and acceptance of the equipment supplied under Contract HF-EQ-6081.

Dan was not able to reconcile the items shown on the Shipping Lists with the Contract Items. This is to be expected since many of the contract items are broken down into components which sound somewhat different on a Shipping List. As an example: the contract calls for six "9 $\frac{1}{2}$ " inch Primary Processor with Dryer and Viewer". Each of these units appears on the Shipping Lists as five separate crates:

1. Head and 1st Tank Section, 9 $\frac{1}{2}$ " Processor
2. 2nd Tank Section, 9 $\frac{1}{2}$ " Processor
3. Drying Cabinet, 9 $\frac{1}{2}$ " Processor
4. Take-off Table, 9 $\frac{1}{2}$ " Processor
5. Blower, 9 $\frac{1}{2}$ " Processor.

Other items are similarly confusing when comparing Contract Item descriptions with the descriptions given on the Shipping Lists.

I have prepared and enclosed a form which should make this relationship much clearer. It lists at the left, the Contract Items, Descriptions and Quantities. At the right are the corresponding Shipping List Descriptions, Shipment Numbers, and Site Breakdowns for each Contract Item. We are certain that every piece of equipment called for under the

25X1A

contract has been delivered and is now at the proper site.

Would you consider signing the certification at the end of three of these forms and returning them to me so that we may assure Dan that we have done our job.

Yours very truly
